Introduction

These data are provided to assist Career and Technical Education professionals in planning and improving Secondary Career and Technical Education programs and to inform the public of the outcomes of those programs. Characteristics of the data important to appropriate interpretation and use are:

1. Each question must be viewed individually; respondents were not required to answer all questions. Who responded to each question and the number of respondents to each question may be different.
2. For some questions, respondents could mark more than one response option.
3. When the number of respondents is low, the data should be interpreted with caution.
4. The sum of the reported percentages may not always equal 100% due to rounding.
5. A small number of individuals were known to be deceased and were not included in any statistics.
6. Where comparison figures are available, "Local" will refer to the subpopulation for this report; "State" will refer either to the similar state subpopulation or to the overall state figures as appropriate.
